[a] - Identifies if the product itself has isolation between input and output based on the requirements of the standard. Output type (Non-isolated, Isolated, Class 2, LED Class 2) is designated based on the requirements that have been applied.

Wired Control a - This device does not have a wired control circuit

Circuit: b - This device has a wired control circuit that is isolated per Supplement SF

c - This device has a wired control circuit that is nonisolated per Supplement SF

+ - Not evaluated

Phase-cut a - This device has not been evaluated per Supplement SH

Dimming: b - This device has been evaluated per Supplement SH

c - This device has been evaluated per Supplement SH for use with specific dimmer models - see UL Report
