

Diffusion Bonded Crystals

Introduction

Diffusion Bonded Crystals consist of one laser crystal and one or two undoped material. They are combined by optical contact method and further bonded under high temperature. Diffusion Bonded Crystal helps to decrease thermal lensing effect considerably.

CASTECH can supply different kinds of Diffusion Bonded Crystals like: $\text{YVO}_4 + \text{Nd:YVO}_4 + \text{YVO}_4$ 、 $\text{YAG} + \text{Nd:YAG} + \text{YAG}$ 、 $\text{Cr:YAG} + \text{Nd:YAG}$...

We have several assembly types as follows

For other assembly type please contact us for more information.
