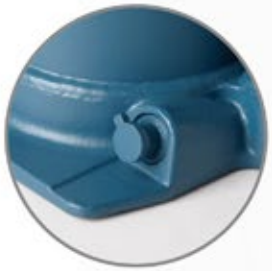
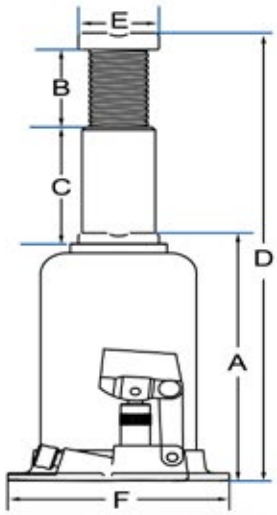
Professional Welding Bottle Jack

Chrome plated

Chrome plated



Inside safety valve



Feature:

- Zinc plated long handle allows ease of pumping.
- Welded construction NO LEAK.
- Safety valve prevents the ram from being overextended and causing damage to the cylinder.
- Inner safety valve prevent the user to adjust the system.
- Arc surface bottom of the steel base to make the load in the center of the piston.
- Prevent rust with ENP (electroless nickel plating) ram piston, make it smooth, bright, and long life.
- Double seals in the pump to prevent the oil leak.
- Light weight forged base provides more steel only where strength is required.
- This design creates a better, stronger design with the tank welded directly to the forged base.
- Longer life than normal screw connection jack due to smooth bearing surfaces and close tolerances.
- Carrying handles on big capacity jack for easy transport.

Complies with ASME Safety Standards

Double Ram Bottle Jacks

- Dual-stage, steel hardened rams allow for longer travel. Lower retracted heights and higher extended heights. Heat treated saddle provides generous lifting area and secure grip.
- A wide, rugged base provides stability and strength. Safety bypass valves prevent overloading.

2 Post Overhead Clearfloor

The ALI CERTIFIED TCE 10,000-lb. Overhead Commercial Lift is the newest and best solution that provides ample door opening clearance for entry to vehicles. Each lift is designed using a single piece column, a variable overhead cross-member, and extra tall carriages that all combine to create a very strong and reliable lift design.

Registered by TORIN Inc.
Designed in USA, Made in China

Optional Overhead 14' Height Extender Kit Shown Is Not Included With Standard Lift

TRAD004Q

PNEUMATIC

Characteristics and performance
The machine is of automatic constant temperature,could realize double-size heating, and is equipped with separate switch for control. What's more, the body mold is equipped with bow-type bracket and transom, making the machine more practical and convenient.Equipped with seven-piece molds, the machine could completely meet the demand of repair any position of tires (such as tire shoulder, tire crown, and tire side), and users only need to select corresponding mould. It is featured by power signal indication, short circuit protection, and optional 120min timing or normally ON, etc.

It is mainly applicable to the repair of various tube tires, small- and medium-size cover tires and vacuum tires.

Electric Chain Hoist

Shell: Light aluminum alloy shell shall be adopted wich is light but hard and fit for the use in the terrible work environment with a high heat dissipation rate and all tightness design.
Inverse phase sequence protecting device:It is the special electrical installation which control the circuit not to work in case of wiring error in the power supply.
Limit switch: The limit switch device is installed where the weight is lifted on and off to make the motor to stop automatically so as to prohibit the chains from exceeding for safety.
24V/36V decice: It is used to prohibit the emergencies from occurring in case of the leakage in the switch.
Side magnetic braking device: This device shall realize the instant brake in case of the power dump.
Chain bag: It shall be light, handsome and durable.
Chain: The chain shall adopt the imported FEC80 ultra heat-treatable Alloy steel chain.
