# About TAIDEN

TAIDEN, one of the world's renowned suppliers of digital conference systems and simultaneous interpretation system, has equipped prestigious international institutions and high profile events including the UN headquarters in New York, Council of Europe, G20 Summits, APEC Summits, Asia-Europe Meeting, and IMF-World Bank Annual Meetings.

UN General Assembly Hall

World Bank Headquarters

BRICS Business Forum 2017

APEC Summit

G20 Hangzhou Summit

In 2015, TAIDEN introduced its worldwide pioneering digital infrared technology into the field of multimedia teaching and released successively a series of classroom audio systems which can be categorized as digital IR wireless classroom audio reinforcement system, interactive audio recording system and lecture recording management platform. The audio systems featuring excellent audio clarity, great immunity to interference and convenient management fully satisfy the need for sound reinforcement, interactive recording and webcasting, and centralized management of all the multimedia equipment in classrooms. In addition, the wireless microphone of digital IR technology provides safe and RF radiation free use. What's more, the e-lock charging station for wireless microphones frees school AV/IT teams from keeping and charging the microphones, creating a genuine maintenance-free solution.

Apart from providing industry-leading solutions, TAIDEN also endeavors to shape the industry standard and promote the development of education informatization, co-developing a series of Chinese national standards and industry standards concerning teaching environment including GB/T 36447-2018 *Multimedia instructing environment design requirements* and GB/T 36449-2018 *General requirements for electronic examination room system* .

# Wireless Audio Reinforcement

---

## Common classroom audio challenges:

**Poor sound due to inadequate classroom acoustics and audio equipment of uneven quality**

### Wired tabletop microphone:

Teachers confined to the lectern, limited interaction between teacher and students

### Hanging microphone:

Greatly distorted sound, negative impact on students' hearing and learning

### RF microphones:

Frequency planning and pairing needed, vulnerability to crosstalk and interferences

## TAIDEN Digital IR Wireless Classroom Audio Reinforcement System

The system based on TAIDEN's patented dirATC – digital infrared audio transmission and control technology, has avoided possible imperfections out of aforementioned solutions and delivers audio of broadcast quality. In classrooms where sound is enhanced by TAIDEN solution, teachers could be more clearly heard with less voice fatigue; students could have improved learning outcomes.

A TAIDEN audio reinforcement system comprises a control unit, IR receiver, IR microphone and speakers. Most of the control units can be directly connected to the existing speakers in classrooms thanks to their built-in audio power amplifiers. For better sound experience, other professional power amplifiers and line array column loudspeaker can be opted.

## World leading technology

## System features

### Excellent audio clarity

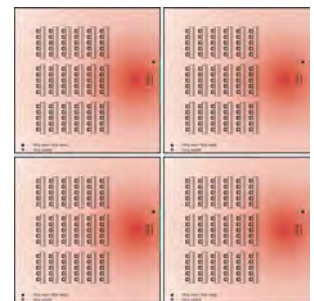

- CD quality audio within a range of 20 meters
- Signal to noise ratio higher than 85 dBA
- Frequency response: 50 Hz ~ 20 kHz

### Immunity to interference

- Allows for simultaneous use in adjacent rooms
- Insusceptible to radio and HF-driven lighting interference
- Works perfectly in direct sunlight

Interferences generated between classrooms using RF systems

Zero interferences between classrooms using IR systems

### Zero RF radiation

- No health hazards resulted from RF radiation
- Worry-free use for long-time wearing

### Convenient operation & management

- Power on to talk, no frequency tuning needed
- Personal mic for each teacher, adding hygienic bonus

Digital Infrared Wireless Microphone

# TES-5600 Series

TES-5600 series featuring built-in power amplifier can be used with existing speakers in the classroom to realize audio reinforcement. The receiver and control box of compact size ensure an easy and neat installation. What's more, the wireless microphone for teacher can be used as a presentation remote to control slideshow.

Even  
sound field

TES-5685M/20 series provides a highly integrated and easy wiring classroom audio reinforcement solution by combining top-firing speaker with control unit, digital IR receiver and power amplifier. Crystal clear sound reinforcement can easily be realized with only one combo unit (TES-5685M/20) and one wireless microphone. The four-sided top-firing speaker ensures even sound field distribution across the classroom.

TES-5641MMN/20

TES-5641 series, a combination of fixed gooseneck microphone, digital IR receiver and power amplifier, fits on the lectern. Audio amplification can be realized via the fixed gooseneck microphone or the wireless IR microphone once the system is connected to existing speakers in the classroom. The wireless microphone can be put back in the e-lock charging station after use to be charged up for following classes. And the e-lock ensures secure storage of the microphone.

# TES-560X Series Digital Infrared Wireless Microphone

TES-560X series microphone, based on the digital infrared audio transmission and control technology, features excellent audio quality with a s/n ratio higher than 85 dBA, ease of use with power on to talk and no frequency tuning needed, and insusceptibility to interference allowing simultaneous use in adjacent rooms. Thanks to its RF radiation free merit, teachers do not have to worry about possible health hazards even for long time wearing. The light-weight microphone can be handheld, attached to collars, ties or pockets or worn around the neck.

The best and most ideal application is “personal mic. for each teacher” to ensure personal hygiene and convenient management.

# HCL-1000 Series Line Array Column Loudspeaker

HCL-1000 Series Line Array Column Loudspeaker, composed of multiple full-range drivers, features natural and high-quality sound in a compact and exquisite enclosure. It offers rich and nice mids, and crisp and sweet highs. Thanks to its wide and even sound field, HCS-1000 series can be used for various applications such as in conference room, lecture hall, ballroom, auditorium and classroom.

## Longer Throw Distance Less Susceptible to Feedback

The internal speaker units arrayed vertically in close proximity form a linear sound source, which guarantees better coverage and less susceptibility to feedback at a longer throw distance.

## Wide Frequency Range Enhanced Performance

A multi-way full range loudspeaker characterized with wider bandwidth, has the lowest frequency at 80 Hz. Default constant resistance mode (8  $\Omega$ ) for higher output level.

## Switchable Speech/Music Mode

HCL-1000 series is versatile by accommodating different applications with enhanced mid-range output in Speech mode and more flat response in Music mode.

## Durable in Outdoor Use

Enclosure designed per IP-54 rate, IEC 529 allows use in a wide range of adverse conditions such as wet, dirty or corrosive environments.

# Interactive Audio Recording and Webcasting

TAIDEN's interactive audio recording solution, working entirely behind the scenes, is a completely non-disruptive tool to capture lectures. Teachers' sound picked up by the IR wireless microphone and students' sound by an exclusive omnidirectional microphone are captured and recorded in sync. The audio captured can be archived for after-class review by teachers and students.

The system is compatible with any third-party streaming and recording products for simultaneous HD capture of both the lecturer and their presentation for live streaming, webcasting, video on demand, after class review by students or teachers' performance assessment.

Aside from audio capturing, the system also amplifies the teacher's sound so that each student can hear clearly anywhere in the classroom.

## IR mic. + array mic

- Digital infrared wireless microphone for the teacher, SNR >85 dBA
- Built-in omnidirectional array microphone for capturing students' sound within a radius of 5 to 8 m
- Optimal recovery of student voice by high-performance DSP
- Audio ducking ensures the priority of IR microphone input over the array microphone input

## Beamforming and adaptive steering technology

- Microphone array using audio beamforming technology steer pickup patterns towards teacher and students, rejecting unwanted noises and reflections
- Bi-color indicator displays standby/working mode, 12-segment indication of sound direction

## Highly integrated, space saving

- All-in-one solution with microphone, power amplifier and speakers
- Compatible with any third party streaming and recording solutions
- Quick, easy and neat setup

## Zero RF radiation, green and healthy

- IR microphone free from RF radiation
- No worries about health hazards for long time wearing

# Project Highlights

## Wuhan University

Wuhan University invested in TAIDEN digital infrared classroom audio system and 5,000 wireless microphones for nearly 500 classrooms. Each and every teacher at the university is provided with a personal wireless microphone for convenient management and personal hygiene. Meanwhile, the classrooms are equipped with TAIDEN e-lock charging stations so that the microphones can be securely stored and charged between class sessions and good to go for classes after. The newly equipped classrooms boast of quality audio reinforcement that is RF radiation free and greatly saves operation costs.

## Wuhan University of Science and Technology

Wuhan University of Science and Technology invested in TAIDEN digital infrared classroom audio system and over 2,200 wireless microphones for 375 classrooms. Teachers have their own personal wireless microphones which offer hands-free operation and ensure personal hygiene. Besides, the school AV team does not have to bother with the management of microphones.
