

### Description

The AR0504P9 is a low capacitance TVS arrays, utilizing leading monolithic silicon technology to provide fast response time and low ESD clamping voltage, making this device an ideal solution for protecting voltage sensitive high-speed data lines. The AR0504P9 complies with the IEC 61000-4-2 (ESD) with  $\pm 30\text{kV}$  air and  $\pm 30\text{kV}$  contact discharge. It is assembled into a 10-pin DFN3020-10 lead-free package. The leads are finished with NiPdAu. Each device will protect up to four high-speed lines. The combination of small size, low capacitance, and high surge capability makes them ideal for use in applications such as USB 2.0, and video interfaces.

### Features

- Low capacitance: 1.5pF typical (I/O to I/O)
- Ultra low leakage: nA level
