## Description

The ASM05R is an uni-directional TVS diode array, utilizing leading monolithic silicon technology to provide fast response time and low ESD clamping voltage, making this device an ideal solution for protecting sensitive semiconductor components from damage. The ASM05R complies with the IEC 61000-4-2 (ESD) with $\pm 30 \mathrm{kV}$ air and $\pm 30 \mathrm{kV}$ contact discharge. It is assembled into a lead-free SOT-23 package. It is designed to protect components which are connected to data and transmission lines from voltage surges.
