

Et-DuPhos

(R,R)-enantiomer CAS 136705-64-1

(S,S)-enantiomer CAS 136779-28-7

EtDuPhos has been proved to be the best ligand for some challenging asymmetric hydrogenation projects documented in the literature.

Can it also be the solution you are looking for to optimise your process?

Product Details

- >98% purity
- >99% ee
- Colourless liquid
- General stock level: 20 g
- Lead time for stock quantities: 2 weeks
- Lead time for larger g quantities: 8 weeks
- Lead time for single kg quantities: 12 weeks
