

NOVAL GLASS – FURNITURE MIRROR

➤ NOVAL GLASS INTRODUCTION

Noval Glass Group Ltd is the professional & leading glass and mirror products supplier from China, monthly exporting hundreds containers to all over the world!

Noval Furniture Mirror is also called Furniture Safety Mirror. It is made of Silver Mirror, Copper Free Silver Mirror or Aluminum Mirror with Grinded or Beveled Edgework and Safety Back Film

➤ EDGEWORK SOLUTION

Noval Glass can offer many kinds of solutions for Furniture Mirror Edgework including Clean Cut, Grinded, Polished and Beveled. Usually the Furniture Mirror is used in a frame, so the polished edge (higher price) seems not necessary. And for workers safety consideration, Clean Cut is also not recommended. Thus the most popular edgework for Furniture Mirror is Grinded, Especially C-Grinded (pencil Grinded).

➤ SAFETY SOLUTION

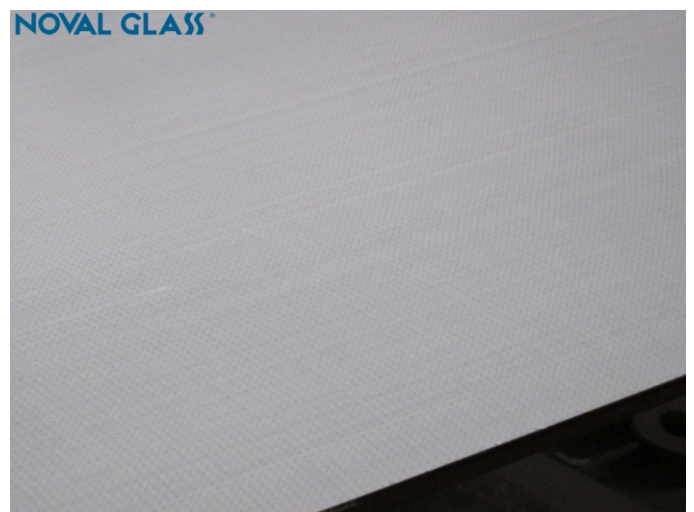

Mirror is made of glass. When glass breaks and falls, it easily causes hurts. That's why we should make the Furniture Mirror to be Safety Mirror.

Safety mirror is produced by attaching an adhesive PE protective plastic film on the backside of mirror. The PE protective film will prevent people from being hurt when the mirror broken. Vinyl back include PE vinyl back (CAT I backing mirror) and woven PP vinyl back (CAT II backing mirror). Usually CAT II film is more popular in Australia.

The safety film is strictly required when the mirror is used for doors, wardrobes and children's room.
