

NOVAL GLASS

SWIMMING POOL GLASS FENCING SYSTEM

SWIMMING POOL GLASS FENCING SYSTEM

ENSURE SAFETY

The glass fencing system adds safety features for children and pets without compromising the look of the property. The fencing panel is made of tempered glass or tempered laminated glass with polished edges. All Noval's fencing features a child-safe gate self-locking system.

INCREASE BEAUTY

With many elegant designs and colors on offer, you can choose whether the glass fencing system will become a feature of your garden or blend into the existing surroundings. Noval Glass pool safety glass fencing system will add beauty, value and security to your home, complementing your garden and pool with that extra touch of luxury.

INSTALL EASY

Generally the spigots or pillars are set into a cored hole in a concrete slab or screwed onto the wood floor, but can be adapted to attach to a variety of surfaces. The glass is then fitted into the spigots or pillars and bolted through the glass to provide a secure structure. The spigots or pillars are made from corrosion resistant marine quality 316 stainless steel, designed to hold the glass above the ground whilst allowing water to flow underneath.

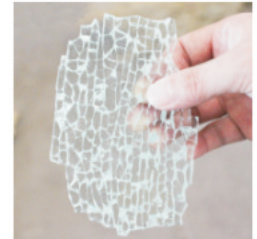

BRIEF INFORMATION

GLASS	Type:	Tempered Glass, Tempered Laminated Glass.

	Type:	Spigot, Pillar, Hanger, Lock, Accessories.
	Surface Finish:	Mirror Polished, Satin.
	Installation:	Concrete, Wood Floor, Steel.
REMARK	Kindly Advise The Base You Will Install The Fence On. Hardware Style, Screws And Accessories May Differ To Different Bases.	

GLASS INTRODUCTION

TEMPERED GLASS

Tempered glass is a heat toughened safety glass. It has under gone a special heat treatment to increase its strength and resistance to impact. In fact, tempered glass is approximately five times more resistant than normal glass. And if broken, tempered glass breaks into small pieces so that it won't hurt people.

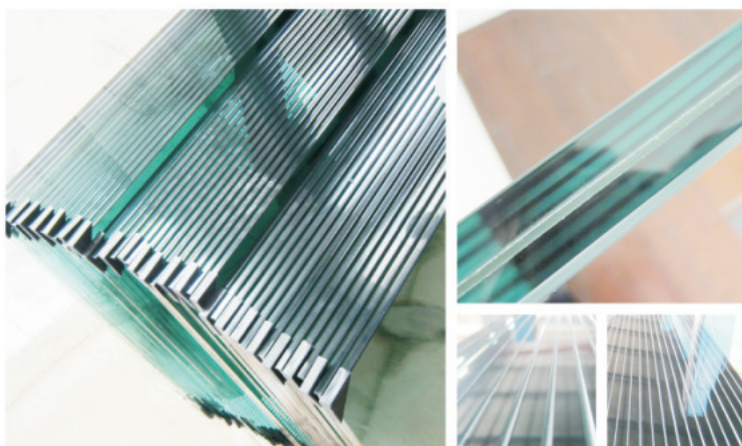

TEMPERED LAMINATED GLASS

Laminated glass comprises two or more sheets of glass bonded together with one or more interlayer's of polyvinyl butyric (PVB) film. After high temperature and pressure treatment, the glass and film is totally become one.

If the laminated glass breaks, the fragments of glass are held in place by the interlayer(s). So tempered laminated glass is a double security solution.

GLASS DETAILS

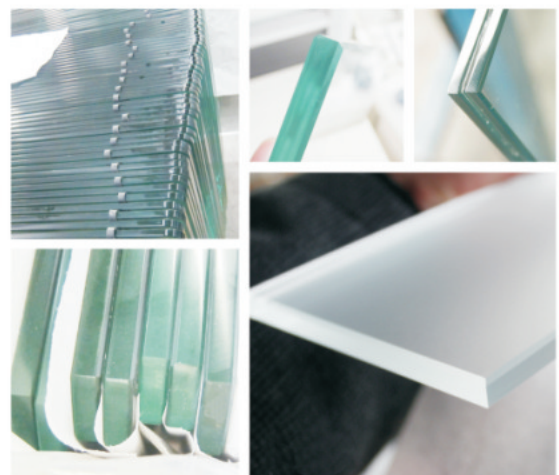

EDGE WORK

Normally the edge of the glass is flat polished, which brings both good safety and fancy looking. If you need round polished, it is also available.

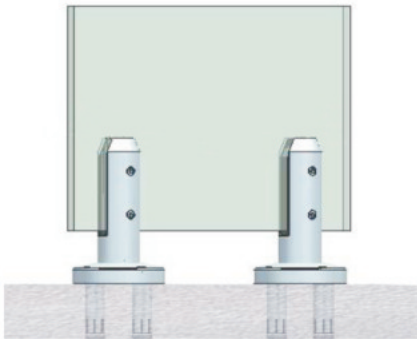

CORNER FINISH

There are several corner finishes. Most popular one is straight corner. Noval Glass can do Rounded corner and cut corner as well. And even your customized design, we will try utmost to carry out.
