Production Management

➤ Preferred Materials / Imported Equipment

We preferred imported raw materials, using Germany Walter, Japan MAKINO and other grinding machines.

➤ Advanced Technology

We combine advanced tool technology with Swiss Balzers coating technology to effectively ensure tool quality.

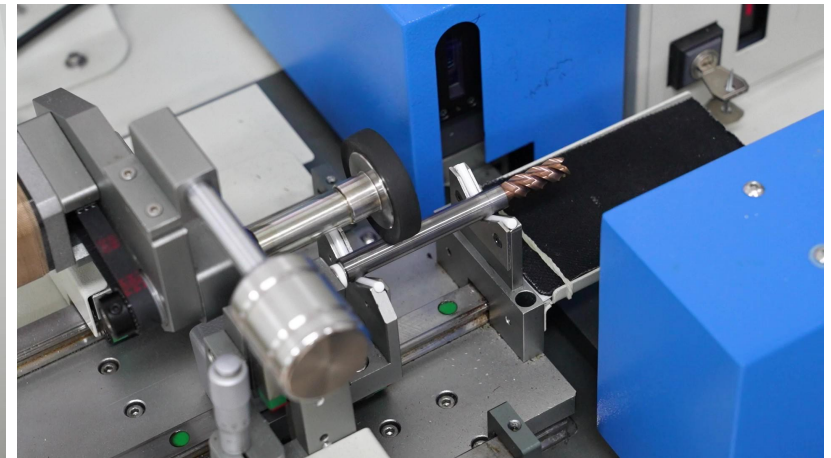

Production Management

➤ Visualization Of Site Control

From design, production, testing to application, we implement visual management and strengthen process monitoring.

➤ Independent R&D Team

The RUNCHIT R&D team has 20 years of technical experience, has a large number of experienced technicians, and is always committed to product R&D and upgrading.

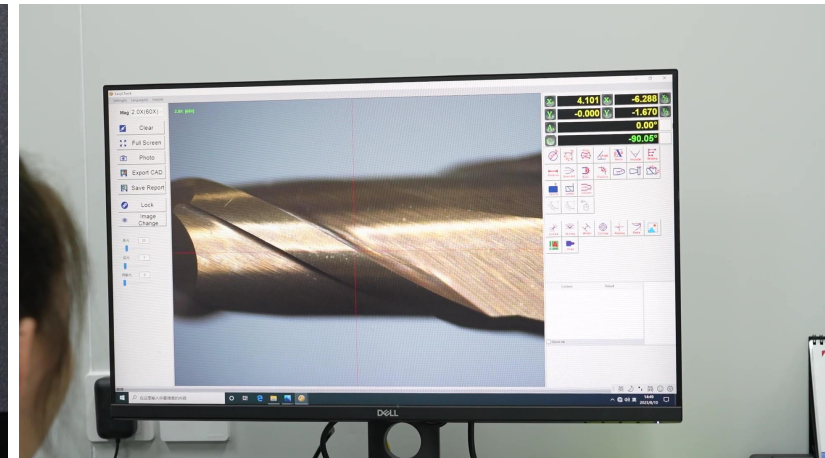

Quality Control

➤ Passed ISO9001 Quality Management System

Formulate and strictly implement the outgoing/incoming inspection standards, quality control by professional personnel to prevent the flow of defective products.

➤ Authoritative Testing Equipment

The German ZOLLER tool detector is adopted to ensure that the product accuracy meets the requirements.

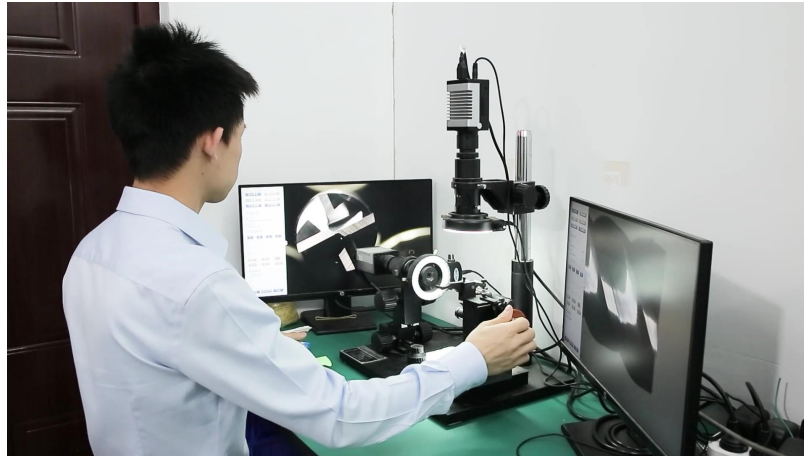

Stock Management

➤ Professional Warehouse Management

RUNCHIT has long-term sufficient spot inventory, professional team management, and ERP system for warehouse and factory docking.

➤ Accurate Inventory

Provide the most direct and accurate results for customers to inquire about inventory, which greatly improves the communication effectiveness.

Business purpose

*Continue to improve the products and
strive to create greater value for
customers*
