Z11 USB 3.2 Gen 2 Portable SSD

Universal features

The Netac Z11 not only supports laptops, desktop computers, mobile devices, but also supports expansion of game consoles, where you can store your games. In addition, it also supports Win To Go (Netac does not sell the system and software, you need to install it by yourself), which can meet the dual system requirements of MacBook users without occupying computer hard disk.

Product overview

The Netac Z11 USB 3.2 Gen 2 Type-C Portable SSD uses a USB 3.2 Gen 2 interface and transmission speeds up to 550MB/s per second for respectively, allowing you move files faster and edit right from the drive. You can store your content and memories on a fast drive, which have up to 1TB of space for a full library of content in a pocket-sized design. In order to provide customers with better after-sales service, Netac stands behind Z11 with a 3-year limited warranty.

Fingerprint recognition

The fingerprint recognition function of Z11 supports omni-directional touch, users can perform the unlock operation from any angle. What's more, users can set 1 administrator password and 10 fingerprint IDs to flexibly manage permissions, which helps users to share beauty with families, and collaboration with colleagues at work.

Fully equipment

The Netac Z11 comes with both a USB Type-C to A cable and a USB-A to C adapter right in the box, so whether you are working on computer or mobile device, and with USB Type-C or Type-A connectors, Z11 works the way you work.

- Form Factor: Portable
- Texture: Aluminum
- Dimensions (L*W*H): 90mm*47mm*8.5mm
- Weight: About 54g
- Color: Silver
- Storage Temperature: -40°C~85°C
- Operation Temperature: 0°C~70°C
- Warranty: 3-year limited
- System Support: Windows 7/8/8.1/10, Mac OS X 10.6 or above, Linux Kernel 2.6 or above, Android 5.0 or above

Ordering Information

Capacity	Part Number
250GB	NT01Z11-250G-32SL
500GB	NT01Z11-500G-32SL
1TB	NT01Z11-001T-32SL

* 1GB means 1,000,000,000 bytes, actual available capacity less.

* According to internal tests, transmission rate are may vary depending on host hardware, software, and usage.

* To achieve optimal performance, the host device and cable must also support USB 3.2 Gen 2 and enable the UASP mode.

Test data are derived from the highest values obtained by Netac Laboratory in a specific test environment, Netac does not guarantee read/write speeds in individual devices.
