

Systems for Other Industries 其它工业窑具系统

Trend's kiln furniture is widely used in the following industries: powder calcination, firing of ferrites, powdered metals, abrasives and grinding tools, high voltage insulators, technical ceramics, glassware as well as food processing.

创导窑具在以下工业领域也被广泛使用：粉体制备与煅烧、磁性材料与铁氧体、粉末冶金、磨料磨具、高压电瓷、技术陶瓷、玻璃制品、食品加工等。

Setter Batt with Nests 巢形辊道窑垫板

Trend developed special cordierite-mullite bodies for the ferrites industry. The maximum working temperature can be as high as 1350°C, which is suitable for setter batts and yoke ring supports for firing soft and hard ferrites in roller kilns and pusher batts in pusher kilns. The batts for firing ferrites need to have excellent thermal shock resistance and dimensional accuracy.

创导公司为磁性材料行业研制的特种堇青石-莫来石材料最高使用温度达到1350°C，可用做烧成软磁和硬磁的辊道窑垫板、垫烧环和推板窑的推板。该行业所用棚板通常需要具有良好的热震稳定性及尺寸的精确性。

Yoke Ring Supports 垫烧环
