

## TOP DRIVE FLOATING CUSHION SUB

---

Top drive floating cushion sub is an important tool in drilling operation. It is suit to the drilling process in oil, gas and geological exploration. Mainly used in inclined and vertical drilling operation and drilling rig vertical drilling operation. It can increase the service life of bearing and gear in top drive rotary box.

### **Technical Specification**

Model	Lifting Load	Stroke	Seal Pressure	Working Torque	Weight	Connection
	Ton	mm (inch)	MPa (PSI)	KN·m (lbf·ft)	KG	
HCJT150	150	76 (3)	35 (5,000)	30 (22,000)	310	6-5/8 REG B × P
HCJT180	180	76 (3)	35 (5,000)	50 (37,000)	440	6-5/8 REG B × P
HCJT250	250	76 (3)	35 (5,000)	50 (37,000)	380	6-5/8 REG B × P
